The 900 FLIEGER model. The calf leather strap is equipped with a satinised pin buckle and contains a strap extension. (1:1 scale)

The 900 FLIEGER model with finely linked, satinized solid steel strap and butterfly clasp in TEGIMENT® technology. (1:1 scale)

The 900 FLIEGER model with leather strap and alligator leather embossing with contrast stitch. (1:1 scale)

The back and side view of the 900 FLIEGER model. (1:1 scale)

Model 900 FLIEGER

TEGIMENT® technology on stainless steel, satin-finished

Dehumidifying technology, for increased security of operation and resistance to misting up

Magnetic field protection up to 80,000 A/m

Second time zone

Sapphire crystal with highly advanced anti-reflective technology

Calculation scales for European and American base units

Nickel-free case back

Pressure-resistant to 20 bar (= 200 m in water)

Safe below atmospheric pressure for high flight altitudes

When it comes to features and technologies, our pilot's watches have been setting the standards since the year dot. A tradition that the Model 900 FLIEGER continues seamlessly. At the same time, the watch boasts contemporary new looks, taking its cue from the famous 900 model series. The result: a chronograph that fulfils the biggest requirements in terms of precision and aesthetics. With the Model 900 FLIEGER, pilots can wear an extraordinarily useful instrument on their wrist. Ensuring this are the five conversion and indicator scales

900 FLIEGER model – night luminescence (1:1 scale)

for European and US American units. The electroplated black dial and case with a 44 mm diameter guarantee perfect readability, even at night, thanks to the backlit appliqués.

The Model 900 FLIEGER demonstrates its suitability for everyday wear through its satinized, stainless steel case, specially hardened using TEGIMENT® technology. Key factors in its favour include magnetic field resistance of up to 80,000 A/m and the sapphire crystal cover glass, incorporating state-of-the-art anti-reflection technology.
