## Models 105 St Sa and 105 St Sa W

Sporty watches with multifunctional rotating bezel.

**Case made of stainless steel, bead-blasted**

**Captive multifunctional rotating bezel with minute ratcheting and Black Hard Coating on a TEGIMENT Technology basis**

**Second time zone on a 12-hour basis**

**Sapphire crystal on both sides**

**Waterproof and pressure-resistant to 20 bar**

**Low pressure resistant**

These models combine uncompromising function and high-quality design in a whole new way. The timepieces boast an impressive combination of technical, sporty design and a diverse range of functions. It's not only the reduced, contemporary look which wins over watch experts, but also the multifunctional rotating bezel, which has shown itself to be a versatile special feature. The advancing minute scale on it allows you to measure time. Or you can use the bidirectional rotating bezel with 12-hour scale to set up a second time zone, with, for example, the hour hand showing the reference time on the dial and the local time on the rotating bezel. The rotating bezel itself has a captive connection to the bead-blasted case. Its Black Hard Coating on a TEGIMENT Technology basis lends the watches a professional overall look.

Depending on your personal taste, you can choose between a matt black and matt white dial with accents in orange. The day of the week and date display can appear in English or German. And beyond high-precision time measurement, you can also observe the refinements of the mechanical movement in great detail through the transparent case back made from sapphire crystal.
