Resistant to low pressure

With their three perfectly legible time zones on a 12- and 24-hour basis, the Frankfurt World Time Watches are among the most popular timepieces in our range of Frankfurt Financial District Watches. The Frankfurt World Time Watch 6096 has a diameter of 41.5 mm, and with an overall height of just 10.1 mm, it is also remarkably flat. The watch is thus extremely comfortable to wear and works very well in combination with a shirt and suit.

The black electroplated dial with sunburst decoration exudes an air of classical elegance and high quality. The deep, silky matt shine accentuates the rhodium-plated appliqué to striking effect. The appliqué are luminous and have been individually attached by hand.

The 6096 features a polished stainless-steel case and sapphire crystal glass. We also use this glass for the transparent back so that the fine, exquisitely decorated movement can be admired. The rotor engraving of the bull and bear, the traditional symbols of the stock market, is a stylish reference to Frankfurt am Main as the birthplace of this watch.
