SPEZIALUHREN ZU FRANKFURT AM MAIN

U1 DS

THE DIVER'S WATCH WITH DECORATIVE
GRINDING DIAL, LIMITED TO 500 PIECES.

U1 DS with black silicone strap. ø 44 mm (scale: 1:1)

U1 DS solid, expandable stainless-steel bracelet with folding safety clasp. ø 44 mm (scale: 1:1)

We have engraved the U1 DS model's dial with an irregular, intricate pattern. This engraving makes every watch unique – the impression achieved on the dial during the machining process can never be repeated.

U1 DS with case and stainless-steel bracelet with TEGIMENT Technology. Solid, expandable stainless-steel bracelet with folding safety clasp.

Model U1 DS

The diver's watch with decorative grinding dial, limited to 500 pieces.

Limited to 500 pieces

Dial with decorative grinding

Case and crown made of high-strength seawater-resistant German Submarine Steel

Case and bezel with TEGIMENT Technology and therefore especially scratch-resistant

Tested based on European diving equipment standards and certified by DNV GL

Captive diver's bezel with minute ratcheting

Crown at 4 o'clock to prevent pressure on the back of the hand

Sapphire crystal glass

Pressure-resistant to 1,000 m diving depth (=100 bar), certified by DNV GL

Low pressure resistant

The U1 DS model, limited to 500 pieces, is a very special timepiece in our range. The diving watch owes this to its dial, which we have grinded with an irregular, decorative pattern. As a result, the wearer enjoys an exciting play of colours as the base material on some parts of the dial reflects different nuances of light. Every watch is therefore a unique piece – the impression achieved on the dial during the machining process can never be repeated. The design still allows for perfect readability – thanks to the striking form and minimalist display.

Alongside these optical characteristics, the watch also boasts high-quality technical features. The case and crown are made of high-strength seawater-resistant German Submarine Steel, which enjoys outstanding non-magnetic properties. The surface of the case and the captive diver's bezel with minute ratcheting have also been hardened with TEGIMENT Technology, leaving them especially scratch-resistant.

The U1 DS guarantees reliability and precision, even under extreme conditions. The DNV GL has verified and certified the U1 DS's pressure resistance to a diving depth of 1,000 metres and its temperature resistance and functionality in accordance with the European diving equipment standards.
