SPEZIALUHREN ZU FRANKFURT AM MAIN

U1 S/U1 SE

DIVING WATCHES MADE OF
GERMAN SUBMARINE STEEL

U1 S – case and diver’s bezel with Black Hard Coating on a TEGIMENT Technology basis. Red silicone strap with a folding safety clasp and expandable strap. ø 44 mm (Figure: 1:1)

U1 SE – case and diver’s bezel with Black Hard Coating on a TEGIMENT Technology basis. Solid, expandable stainless-steel bracelet with folding safety clasp. ø 44 mm (Figure: 1:1)

DNV GL verifies and certifies the pressure resistance of our **U1 S** and **U1 SE** to a diving depth of 1,000 m as well as temperature resistance and function based on EN250 and EN14143, the European standards for diving equipment.

Back view and side view. (Figures: 1:1)

U1 S – luminous. (Figures: 1:1)

U1 S/U1 SE

Diving watches made of German Submarine Steel.

Case and crown made of high-strength seawater-resistant German Submarine Steel

Tested based on European diving equipment standards and certified by DNV GL

Pressure-resistant up to 100 bar (= 1,000 m water depth), certified by DNV GL

Captive diver’s bezel with minute ratcheting

Black Hard Coating on a TEGIMENT Technology basis

U1 SE: Ivory-coloured coating on the indices, hands and numerals

Sapphire crystal glass

Resistant to low pressure

The U1 S and the U1 SE are two attractive new versions of one of our most popular diving watches, the U1. Previously, the U1 was available with a black diver’s bezel. As the U1 S, the watch now comes with an all-over Black Hard Coating on a tegimented basis, which further highlights its design.

The U1 SE also features distinctive colouring, with a striking combination of high-quality Black Hard Coating and ivory-coloured accents. This vintage-style colour scheme makes for an eye-catching contrast on this watch.

The case and crown of both the U1 S and the U1 SE are made of high-strength seawater-resistant German Submarine Steel. As well as having extreme seawater resistance, this material possesses the highest level of non-magnetic properties. Thanks to its captive design, it is virtually impossible for the diver’s bezel with minute ratcheting to become detached from the case as a result of hard knocks.

Both watches have been checked for pressure resistance and tested based on European diving equipment standards and certified by DNV GL. This confirms that they are highly reliable.
