- Transparent case back made of sapphire crystal glass
- Waterproof and pressure-resistant to 10 bar
- Low pressure resistant

The 1739 World Heritage Darmstadt model is an extraordinary special edition that recognises the Mathildenhöhe Darmstadt's status as a UNESCO World Heritage Site. This watch is limited to just 100 pieces, making it a true collector's item. The design of the dial and hands of the 1739 World Heritage Darmstadt model was inspired by the two clocks on the Wedding Tower at Mathildenhöhe. Every detail is carefully crafted to reflect the charm and elegance of the original tower clocks. The black electroplated dial is complemented by an ornate silhouette of the Wedding Tower, skilfully showcasing Mathildenhöhe's famous landmark. The crystal made of sapphire crystal with an anti-reflective coating on both sides expressively highlights the distinctive features of this special edition. The gold-plated rotor can be admired through the transparent case back made of sapphire crystal glass. The rotor features engravings of the Christian symbols of faith, love and hope, which are also depicted in the three arches below the dial of the Wedding Tower clock. Besides its aesthetic beauty and symbolic significance, the 1739 World Heritage Darmstadt model is suitable for everyday use as is typical of SINN watches – it is water-resistant and pressure-resistant up to 10 bar, and is resistant to low pressure. The 1739 World Heritage Darmstadt model is a watch that combines history, design and craftsmanship, allowing you to wear a piece of the UNESCO World Heritage Site on your wrist.
