SINN SPEZIALUHREN GMBH

The 556 I WT model is a premium watch with an elegant design that we have developed exclusively for the renowned specialist watch magazine WatchTime Germany. Only 200 of these special edition watches are being produced. The eye-catching dial features an exquisite colour gradient from red to black and is adorned with a magnificent sunburst decoration. Appliques attached by hand add subtle yet stylish touches that indicate attention to detail.

The case is made from satinised stainless steel for a modern look that will never go out of style. The sapphire crystal provides a clear view of the dial and its beautiful design. Also made from sapphire crystal, the transparent case back allows the mechanical movement and limited edition number rotor engraving to be admired in all their intricacy.

This timepiece has a stunning design, but it is also impressively durable. The watch is resistant to low pressure, water-resistant and pressure-resistant up to 20 bar, making it highly dependable.

Wearers can count on the 556 I WT model at work, at home and on the most special of occasions. The watch even comes in a double case with two different straps to choose from for two noticeably different looks. The black calf leather strap has a classic, elegant feel to it, while the gracefully designed solid bracelet makes a bold statement. The two straps have different styles, but they both capture the unique spirit of the watch in their own special way.
