Each Frankfurt Financial District Watch is distinguished by its individual characteristics. And model 6052 is no different. The classic chronograph boasts a handy calendar week display – the first special function of its kind to be used in a watch with this display configuration. In addition to the calendar week, the dial also displays the day, date and month, making the 6052 the ideal watch for organising business appointments and planning activities – without the need for a calendar. This special function is enabled by the SINN movement SZ03, a modification designed and implemented by us. Besides its useful instrumental value, the 6052 is also an elegant piece of jewellery – thanks to a polished stainless-steel case, sapphire crystal glass on both sides and classy engraving on the rotor.
