

903 St B E II

The navigation chronograph.

- Dark blue dial and luminous ivory coating
- Case made of stainless steel, polished / satinised
- Column wheel chronograph, exquisitely decorated
- Hybrid ceramic luminous elements, meticulously attached by hand
- Sapphire crystal glass
- Transparent case back made of sapphire crystal glass
- Bezel with logarithmic scale and slide rule function
- Water-resistant and pressure-resistant up to 20 bar
- Low pressure resistant

The 903 series is presented in a version that has been technically completely redesigned. Visually recognisable, the navigation chronograph 903 St B E II is available as a standard model with a dark blue dial and has been elevated to an unparalleled technical level. The functionally designed dial imprints the navigation chronograph in our product range with decades of tradition. For example, the slide rule bezel with logarithmic scale can be used to calculate times, distances or fuel consumption. Of particular note is the use of hybrid ceramic luminous elements in the indices, which are meticulously attached by hand, the number 12 and the hour and minute hands. By integrating the illuminating pigments into the respective hybrid ceramic moulded part, a high concentration of illuminant is achieved, resulting in extreme light intensity and perfect readability in the dark. However, the redesign of the case of the 903 St B E II in particular once again demonstrates our company's high level of innovation. This case features a silver-electroplated rotating bezel on the which can be smoothly operated from the outer diameter of the watch. The impressive waterproofness of 20 bar testifies to a feat of engineering that has long shaped the SINN brand. The Tri-Compax arrangement of the silver-electroplated counters completes the classic navigation chronograph's design. The crowning glory of this model is its column wheel chronograph movement, which has a power reserve of at least 60 hours when fully wound. Watch connoisseurs will immediately recognise that the SINN logo as an appliqué is another fine detail of a consistently sophisticated watch.

Technical details

Mechanical Movement

The information on the mechanical movement corresponds to the current production situation in Frankfurt am Main. Due to technical changes, it may happen in individual cases that stock items of our sales partners deviate from this information.

- LJP L110
- Self-winding mechanism
- 26 bearing jewels
- 28,800 semi-oscillations per hour
- Seconds stop function
- Anti-magnetic as per DIN 8309

Case

- Case made of stainless steel, polished / satinized
- Sapphire crystal glass in front, anti-reflective on both sides
- Transparent case back made of sapphire crystal glass, anti-reflective on the interior
- Case back screw-fastened
- Winding crown screwable
- Meet the technical requirements for water-resistance, as set out in standard DIN 8310
- Water-resistant and pressure-resistant to 20 bar
- Low pressure resistant

Functions

- Hours, minutes, subsidiary seconds
- Date display
- Chronograph
- Bezel with logarithmic scale and slide rule function

SINN SPEZIALUHREN GMBH

Dimensions and Weight

- Case diameter: 41 mm
- Band lug width: 22 mm
- Case thickness: 14,5 mm
- Weight without strap: 84 gramme

Dial and Hands

- Dark blue dial
- Counters and interior bezel electroplated in silver
- Number "12" and indices made of hybrid ceramic luminous elements, meticulously attached by hand
- Hour and minute hand made of hybrid ceramic luminous elements

Warranty

- 2 years
