

## U50 S BS

### The diving watch made of German Submarine Steel.

- Limited to 500 pieces
- Blue and black gradient dial
- Case and crown made of high-strength seawater-resistant German Submarine Steel
- Black Hard Coating on a TEGIMENT Technology basis
- Tested based on European diving equipment standards and certified by DNV
- Waterproof and pressure-resistant to 500 m (= 50 bar), certified by DNV
- Captive diver's bezel with minute ratcheting
- Crown at 4 o'clock to prevent pressure on the back of the hand
- Sapphire crystal glass
- Low pressure resistant

A monochrome design with black case and unusual blue and black gradient dial to match – limited to 500 pieces, the Model U50 S BS promises an exciting watch at very first glance! The Black Hard Coating on a TEGIMENT Technology basis lends the watch a high-quality, professional look. This combination is also the most durable form of black coating feasible according to the latest advancements in technology. As a sturdy and precise timepiece, the watch also meets the requirements of professional divers for maximum reliability and clear readability. Thanks to these attributes, the U50 S BS also often proves to be an additional safety device with pragmatic features, such as a case made of high-strength seawater-resistant German Submarine Steel. Those in the know immediately know: this lends the watch exceptional high strength and outstanding non-magnetic properties. The captive rotating bezel prevents the loss of set times. The U50 S BS was put through its paces by the DNV, the independent classification company that verifies and certifies pressure resistance to a diving depth of 500 metres (= 50 bar) and temperature resistance and functionality in accordance with the European diving equipment standards.

## Technical details

### Mechanical Movement

The information on the mechanical movement corresponds to the current production situation in Frankfurt am Main. Due to technical changes, it may happen in individual cases that stock items of our sales partners deviate from this information.

- SW300-1
- Self-winding mechanism
- 25 bearing jewels
- 28,800 semi-oscillations per hour
- Seconds stop function
- Anti-magnetic as per DIN 8309

### Case

- Case made of German Submarine Steel
- Sapphire crystal glass in front, anti-reflective on both sides
- Case back screw-fastened
- Crown screwable
- Meet the technical requirements for waterproofness, as set out in standard DIN 8310
- Waterproof and pressure-resistant to 500 m diving depth (= 50 bar), certified by DNV
- According to the technical demands for the diving norm DIN 8306
- Tested based on European diving equipment standards EN 250 / EN14143, certified by DNV
- Low pressure resistant

### Functions

- Hours, minutes, seconds
- Date display
- Diver's bezel with minute ratcheting and luminous key mark

### SINN Technologies

- Black Hard Coating on a TEGIMENT Technology basis
- Captive bezel
